Senior Software Developer

Full-time On-site — Hamedan, Iran

Tokan Tav Tejarat

June 2022 – December 2022

- Worked closely with the CEO, did tens of interview sessions with the stakeholders, analyzed business needs, designed database, generated Entity Relationship Diagrams (ERD), and implemented Laravel~MySQL migrations. Extracted data from third-party sources, transformed and normalized data using Power BI, and merged results into Laravel seeds.
- Initialized RESTful back-end with Swagger client, implemented token authentication as well as API versioning. Wrote scaffolding scripts to generate codes for common operations on the Data Layer which optimized DX by removing repetitive tasks and fasten the development process by 300%.
- Led a team containing a front-end Ionic-ReactJS developer, front-end web developer, back-end PHP developer, SEO specialist, and content managers. Reviewed the documentation to ensure the successful transfer of the project knowledge and decisions to the next team.
- Assigned tasks to the team on Kanban board based on Work Break Structure and Gantt chart, and did review and merge of the Pull Requests.
- Installed GIT, CDN, SMTP, KMS, workflow, FTP, monitoring, and database servers. Wrote bash scripts and triggered them using CronJobs to automatically clone reviewed codes and run migrations of micro-services (CI/CD).
- Used Google Analytics, Google Trends, and Google Search Console to increase the SEO mark of the web pages and to leverage the content writers' efficiency.
